PROFESSIONAL SUMMARY

Web Developer with hands-on experience in building component-based applications using React.js, creating responsive user interfaces, and implementing REST API integrations. During my internship as a Full Stack Web Developer, I successfully delivered production-grade features, including real-time dashboards, state management, form validation, and automated alert systems. Proficient in JavaScript (ES6+), HTML5, CSS3, and React.js, I possess a strong understanding of web security fundamentals, XSS prevention, and performance optimization.

TECHNICAL SKILLS

Frontend	: React.js , JavaScript (ES6+), HTML5, CSS3, Responsive Web Design, Component-Based Architecture
State & API	: React Hooks, State Management, REST API Integration
Security & Performance	: Input Sanitization, Web Security Fundamentals, Rendering Performance Optimization
Languages & Database	: Java (NPTEL Certified), Python, MySQL
Tools	: Git, GitHub, VS Code, Vite

EXPERIENCE

Frontend Developer Intern Pargavan Cyber Solutions, Coimbatore	2025 – 2026
- Architected the GIMS frontend using React.js and JavaScript (ES6+) with a component-based architecture spanning Dashboard, Inventory, Alerts, and Reports modules, enabling real-time inventory auditing and role-based data management. - Built reusable React components with state management via React Hooks and Context API, improving rendering efficiency and reducing code duplication across the application. - Integrated REST APIs for live stock data flow; implemented XSS-safe form validation and input sanitization to protect sensitive operational data from injection vulnerabilities.	
Automation Intern IPCS Automation, Coimbatore	2024
- Built Python scripts for data processing and workflow automation. - Gained hands-on exposure to PLC integration and real-time industrial data monitoring.	

PROJECTS

1. GIMS: Generic Inventory Management System React.js, JavaScript (ES6+), HTML5, CSS3, REST APIs, MySQL	2026
- Developed a full-stack responsive web application with real-time stock lifecycle management, automated threshold alerts, and secure role-based access control. - Enabled efficient inventory auditing, live data tracking, and multi-user operational control.	
2. Automatic Epileptic Seizure Detection & Mobile Alert System ESP32, IoT, Fuzzy Logic, ThingSpeak, GSM	2026
- Built an ESP32-based IoT system integrating EMG, pulse, temperature, and accelerometer sensors with fuzzy logic. - Implemented GSM mobile alerts and ThingSpeak cloud monitoring for real-time emergency response.	
3. Android Text Validation – Jetpack Compose	2025
- Led a 3-member team to deliver a modular UI validation system using Jetpack Compose. - Applied reusable component design for improved maintainability and user experience.	

EDUCATION

Bachelor of Engineering in Computer Science and Engineering	2022 – 2026
RVS College of Engineering and Technology, Coimbatore CGPA: 7.64 / 10	

CERTIFICATIONS

- UI Developer Certification – Infosys Springboard2025
- Programming in Java – NPTEL 2024
- Cloud Infrastructure – Oracle University2024
- Python Programming – IPCS Automation2024
